Personal Statement

I am applying for the role of a software engineer and I am passionate about learning and gaining work experience in all fields related to computer science. I hope to get a job in the ICT industry as my biggest interests in life are computers and mathematics.

I pride myself on being able to get along well with others at work. Everybody I have worked with at Uni and at all of my jobs has enjoyed getting to know me, I am always friendly and try my best at work every time. My biggest strengths are working to get jobs done to the best standard every time, as well as working with the team to make sure our work is of high quality inside and out.

Skills and Projects

The main project that I have been involved in as part of my university courses was a year-long software engineering course, developing a website in a team of 7 people. I really enjoyed working on a long term project with a team, it was nice getting to know them and being able to pair with them to get tasks done together.

The main focus of the course was to teach about Scrum, as well as to introduce us to common tools used to develop software such as

- Build tools Gradle and Spring Boot
- Testing tools Cucumber, Mockito mocking and testing framework and JUnit
- Selenium for automated testing
- Code quality tools SonarQube and SonarLint
- Thymeleaf, HTML and JavaScript for the frontend of our application
- Java with Hibernate DBMS, gRPC for the backend
- IntelliJ IDE and Git version control
- Communication tools Slack and Zoom

On top of that in my other courses I have gotten familiar with many other languages such as

- Unity and C# for VR game development
- C++ when creating 3D graphics using OpenGL
- Node.js, TypeScript and React for building a back and frontend for a website for creating and bidding for auctions, similar to TradeMe
- SQL when learning about relational databases as well as database algebra and calculus
- C programming language when learning programming for microcontrollers
- My strongest language overall is Python as it was the language most of my courses chose for programming assignments

I also really enjoyed learning about branches of mathematics such as logic, graph theory and cryptography. Cryptography is my favourite field of mathematics as it is very relevant to computer science, being able to protect websites and yourself from security vulnerabilities is incredibly important for keeping personal data safe. I found it really enjoyable learning how data such as banking information

and passwords are able to be kept secure over the internet even when other people can intercept the message. My long term goal is to work in cyber security to help prevent websites and people against cyber attacks.

Education

Bachelor of Science (Full time), Major in Computer Science, University of Canterbury, 20 Kirkwood Avenue, Upper Riccarton, Christchurch 8041

January 2020 to June 2023

Graduated on the 29th of August 2023

In high school for NCEA level 1, 2 and 3 I did mathematics and lessons on IT and coding at Trades Academy.

Work History

IT Contractor (As required), HQ Recruitment, <https://hqr.co.nz/>

October 2023 to Present

- Replacing computer monitors for a Westpac Office
- Cleaning IT equipment for Woolworths stores

No new assignments since November

Housekeeper (Part time), Tasman Holiday Parks, 39 Meadow Street, Papanui, Christchurch 8052

December 2021 to May 2022

- Cleaning and tidying motel rooms to be spotless for customers
- Working with a partner and learning from them to get the best job done
- Cleaning communal and motel spaces inside and out

Delicatessen Assistant (Part time), New World, 116 Revell Street, Hokitika

July 2019 to December 2019, and December 2020 to February 2021

- Cooking and making food with the best presentation
- Cleaning down the kitchen ready for the next day
- Serving customers quickly with friendly service
- Working as a team member in a kitchen

Cleaner (Weekdays, 1.5 hours each day), Hokitika Collision Centre, 63 Kumara Junction Highway, Seaview 7882

October 2016 to December 2019, and December 2020 to February 2021

- Sweeping the entire workshop of dust each day
- Cleaning and dusting large machines and equipment
- Working safely with chemicals to clean car paint
- Assisting workmates with moving and installing heavy car parts
